

ALZA Claude Code Workflow — Setup Guide

Step 1: Copy this folder to your computer

Move the entire `alza-workflow/` folder anywhere on your machine. Example:
`~/Documents/alza-workflow/`

Step 2: Open in Claude Code

`cd ~/Documents/alza-workflow`

`claude`

Claude Code will automatically load `CLAUDE.md` — giving every session full ALZA context.

Step 3: Start your first client

`/new-client`

Claude will ask you 5 questions, then generate the audit, outreach sequence, sales prep, and proposal — all saved to `clients/[business-name]/`.

All Available Commands

Command	When to use
<code>/new-client</code>	Start here for every new prospect
<code>/audit [name]</code>	Regenerate or standalone audit
<code>/outreach [name]</code>	Cold email sequence (3-touch)
<code>/sales-prep [name]</code>	Pre-call cheat sheet + full script
<code>/proposal [name]</code>	Full proposal document
<code>/onboard [name]</code>	After they sign — onboarding checklist
<code>/report [name]</code>	Monthly performance report

Command	When to use
/content [name]	Social media content batch
/blog [name]	SEO blog post
/newsletter [name]	Monthly email newsletter
